

DATA SCIENCE UPSKILLING BOOTCAMP 2021

Participant Feedback

WADSIH, in conjunction with Halliburton, facilitated the Data Science Upskilling Bootcamp for the second consecutive year. This interactive and hands-on online workshop gives WA industry professionals the opportunity to think, work, and create value like a Data Scientist.

In case you're wondering if this bootcamp is for you, we've shared some feedback from this year's participants who range from CEO's to interns, and data analysts to electrical engineers.

“

I envisage using the techniques and tools I learned to improve the way we surface meaning from the business data that we have.

“

The Visualizations part of the training was really helpful, and I am hoping to apply them in my current role

“

Definitely a worthwhile investment of my time and I'm excited to see how I can apply what I learned in practice.

“

I have already had conversations with data scientist collaborators that were improved by me having done this course.

“

I found the course fascinating and it opened my eyes to a whole new way of accessing and analysing data.

“

I liked the mix of data science/machine learning theory and working through the coding examples.

“

This course has inspired me to seek out more data analysis training and opportunities.

“

I am excited about having some basic understanding of machine learning methods so that I can better facilitate conversations between the domain experts and data scientists I am working with.

“

I got to learn some modern techniques for building algorithms for data processing and analysis.

“

Course information was really good and clear. It wasn't too technical and good explanations.

“

Having more hands-on experience with python was very useful for incrementally building up my coding skills.

“

I thought the teachers were all very good, and good at teaching online. I appreciated the range of questions they were able to answer.
